

Environmental Policy 2023 - 2026

Shobana Jeyasingh Dance is committed to delivering high quality touring and Creative Learning programmes in the most sustainable ways possible.

Objectives

- Continue to use the current framework, originally developed in consultation with Julies Bicycle, to monitor our environmental impact and benchmark this against available sector data.
- Aim to be below the sector average in terms of overall impact

To deliver this, Shobana Jeyasingh Dance aims to:

1. Gauge the environmental impact of key activities, where feasible and appropriate, using freely available tools, as well as our own measures.
2. Communicate and discuss this information with staff and stakeholders, using this as the basis for finding ways to reduce our environmental impact.
3. Based on these discussions, develop practical guidelines for reducing our environmental impact and share these with staff and stakeholders.
4. Work with organisations and partners within our sector to learn, as well as share, knowledge, best practice and experience.
5. Monitor and evaluate progress on implementing this policy at Board meetings annually.

This policy has been developed by Shobana Jeyasingh Dance. It is adopted by the Board of Directors and is shared with all staff and other stakeholders.
